

## Greg Berry Awarded Fellow Status

**Greg, of KBR, is a Past Chairman of South Texas and of the Apollo Subsection**

### **What is Fellow Status Membership?**

A Fellow, one who has attained a membership grade of distinction, at the time of advancement shall be a corporate member of the Society, shall have been responsible for significant engineering achievements, and shall have not less than 10 years of active practice and 10 years of continuous corporate membership in ASME.

#### **Greg Berry:**

In his current leadership role at KBR, Greg is Chief Technology Engineer for Machinery, a highly responsible position that includes the hiring, training, supervision, work processes, and quality assurance for over 70 professional employees who provide technical support for the acquisition of rotating machinery for world scale process plants that produce ammonia, olefins, liquefied natural gas, refined oil products, and related utilities. The annual value of the equipment for which Greg is responsible is well in excess of 100 million dollars. Greg has performed this function with dedication and conviction for the past 3 years, and he has received accolades for his work. He has achieved this responsibility at a relatively early stage in his engineering career. Greg is a mentor to socio-economically deprived high school students in the Houston area through the KBR Discover Engineering program.

Greg ascended to the South Texas Section Board after his Chairmanship in the South Texas Apollo Subsection during 2001-2003. His strong and innovative leadership increased the membership and attendance at their meetings markedly, further strengthening an already successful Group.

In 2003-2004 Greg joined the South Texas Board as Treasurer, and became invaluable to the continual functioning of the South Texas Group during the next six years. Serving as Treasurer multiple years, prior to his Chairmanship. Greg has built a core of young leaders with new ideas, blended with experienced members, many of whom are our Past Chairmen, to create a strong and viable Group with a tremendously increased meeting attendance due to quality technical presentations.
